

REFERENCE PREPARATION GUIDE

References

All references cited in the text, including those in tables and figures, have to be listed in the References section according to the order of their appearance in the manuscript. If some reference appears in the text more than once, do not repeat it in the references list. Reference numbers should be placed in square brackets [], and placed before the punctuation; for example [1] or [2-4].

Examples of in-text citations:

- ... text text text [1].
- ... text text text [1, 2].
- ... text text text [3-6].
- ... text text text [1] ... text text text [2-5].
- ... According to James et al. [5] the influence of...
- ...James [5] stated that...

Reference list

The list of references should only include works that are cited in the text and that have been published or accepted for publication. Personal communications, Forest management plans and unpublished works should only be mentioned in the text, preferably in parentheses (Dr. John Do, University of Zagreb, pers. comm. in 2011). Avoid citing non-scientific literatures (e.g. legislations, regulations, web pages, etc.) as much as possible.

a) Journal paper:

Cite in sequence all authors names and initials (last name first, then the first letters of the first name and, if available, the first letters of the middle name), the year of publication, the title of paper, the abbreviated name of journal, the volume and issue number of the journal, and first and last pages. There should be no punctuation other than a comma to separate the authors. Abbreviate journal titles according to the ISO4 Abbreviation (<http://www.issn.org/en/services/online-services/access-to-the-ttwa/>) and Journal Title Abbreviations from Web of Science (http://images.webofknowledge.com/WOK46/help/WOS/A_abrvjt.html).

Do not use footnotes or endnotes as a substitute for the reference list.
